

A Study of Youth Development and Family Relations

Dear Students:

We invite you to participate in a research study being conducted by investigators from The University of Iowa. The purpose of the study is to examine and compare the changing relationships between teenagers and their families from five different countries.

If you agree to participate, we would like you to read the questions that deal with your relationship with your parents and other members of your family and your attitudes about related matters. For each question, you are asked to choose appropriate answers that apply to you most closely. You are free to skip any questions that you prefer not to answer. It will take approximately 30 minutes to finish the whole questionnaire.

Taking part in this research is completely voluntary. If you do not wish to participate, simply return the questionnaire to one of us. If you are willing to participate, we will provide you with a \$10 gift certificate in appreciation of your time and cooperation. We will also make small contribution to your school. To claim your gift certificate, you only need to inform us that you have attempted to answer the questions sincerely when you return the finished questionnaire to us.

Your answers will be handled electronically and purely for statistical analysis. We will not collect your name or any identifying information about you, except your age and gender. It will not be possible for anyone to link you to your responses. Your anonymity is further assured by the fact that we will collect similar data from one hundred other student with the same age and gender as yours.

If you have questions about the rights of research subjects, please contact the Human Subjects Office, 300 College of Medicine Administration Building, The University of Iowa, Iowa City, IA 52242, (319) 335-6564, or e-mail irb@uiowa.edu

Thank you very much for your consideration of this research study.
