Please note

In the codebook, each frequency table consists of a variable name, question, and frequency table. The first column, RESPONSE, indicates response categories and the second column, PUNCH, is a value for each response category. The third and fourth columns, FREQ and PERCENT, show the number of individuals and percentage of individuals belonging to a specific response category. The last column VALID % is the percentage of individuals who are assigned to a specific response category without missing data, such as DK (Don't know), NA (No answer), and NAP (Not applicable).

Since the 6th Republic started, the settlement of frauds and corruptions in the 5th Republic has become the most important political issue. What do you think about this?

RESPONSE	PUNCH	FREQ.	PERCENT	VALID %
The current ruling party and the opposition parties should negotiate over this issue (two former presidents appearing in hearings held by the National Assembly and the resignation of five key individuals of the 5th Republic from all current offices)	1	487	31.7	31.8
The negotiation between the ruling and the opposition party cannot completely clear the corruption of the 5th Republic and a more fundamental and thorough measure is necessary	2	694	45.2	45.3
